

# Elevator Rope

# Syncor

- can be used where adverse operating conditions exist (high groove pressure)
- increases service life by 200% in some applications
- provides increased fatigue resistance, reducing the number of internal breaks
- resists diameter reduction
- maintains its strength longer than standard elevator rope in severe bending applications
- follows standard field lube practices
- ASME & CAN/CSA inspection & removal criteria still apply
- available in 1/2" and 5/8" diameters
- manufactured in a right regular or lang lay 8x19 Seale construction
- less field lubricant
- less stretch
- less moisture absorption
